

AJIT WADIKAR

Full Stack Developer (React · Node.js · MERN)

Pune, MH, India • +91 9764974487 • ajitwadikar2050@gmail.com • [GitHub](#) • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of professional experience building production-grade web applications. Specialized in React.js frontend architecture — reusable component libraries, custom hooks, and Zustand-based state management — alongside solid Node.js/Express.js backend skills covering REST API design, authentication, and MongoDB. Worked on complex enterprise web tools managing large datasets, multi-role workflows, and real-time service operations. Committed to clean code, component reusability, and maintainable architecture.

PROFESSIONAL EXPERIENCE

Frontend Developer · Meltx Software solution, Pune

Jul 2025 – Present

- Contributed to enterprise web applications handling IT service operations — including service request tracking, asset lifecycle management, and multi-level approval workflows — gaining hands-on experience with large-scale, data-heavy frontend systems.
- Built and maintained a reusable component library (data tables, modals, form controls, status badges, breadcrumbs) shared across multiple product modules, reducing duplicated code by ~40%.
- Managed complex application state using Zustand stores — keeping UI logic decoupled from component trees and enabling predictable, testable state flows.
- Integrated RESTful APIs across role-based dashboards; handled paginated data, dynamic filters, and form submissions with proper loading, error, and empty states.
- Maintained consistent code quality through strict folder structure, component naming conventions, and separation of concerns — making the codebase scalable and easy to onboard.
- Collaborated closely with backend and QA teams in agile sprints; participated in code reviews and contributed to frontend architecture decisions.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Daisy UI, Bootstrap, Redux
State Mgmt	Zustand, React Context API, Redux Toolkit
Backend	Node.js, Express.js, REST API design, JWT authentication, bcrypt, Middleware
Database	MongoDB (Mongoose), SQL basics
Dev Tools	Git, GitHub, Postman, VS Code, Chrome DevTools, MongoDB Compass
Practices	Reusable component architecture, DRY principles, clean folder structure, code reviews

PROJECTS

HRMS — Human Resource Management System *React.js · Node.js · Express.js · MongoDB · Zustand · Tailwind CSS*

- Designed and built a full-stack HR platform covering employee records, attendance, leave management, and role-based access control (Admin / HR / Employee).
- Architected a shared component library (DataTable, Modal, FormInput, PermissionGuard) reused across all modules — keeping each feature page lean and consistent.
- Used Zustand stores for auth, employee, and leave state; wrote domain-specific custom hooks to encapsulate API calls and approval logic.
- Built the complete REST API with Node.js + Express.js; secured endpoints with JWT middleware and role-based route guards.
- Delivered a clean, responsive dashboard UI with light/dark theme support using Tailwind CSS.

Book Store App *React.js · Node.js · Express.js · MongoDB · Tailwind CSS · Daisy UI*

- Built a full-stack bookstore with JWT login/signup, bcrypt password hashing, and protected frontend routes.
- Developed REST APIs for book and user management; used React Context API for global session state.
- Implemented a responsive, theme-aware UI with Daisy UI and Tailwind CSS.

My Assistant *JavaScript · Web Speech API · HTML · CSS*

- Created a ChatGPT-style voice + text assistant using the Web Speech API for recognition and synthesis — fully in vanilla JavaScript with no frameworks.
- Showcased strong DOM manipulation, event-driven programming, and browser API integration skills.

EDUCATION

B.E. in Computer Engineering · **Deogiri Institute of Engineering & Management Studies, Chh.**

Sambhaji Nagar

2020 – 2023

CGPA: 7.58

Diploma in Computer Engineering · **VVP Polytechnic, Solapur**

2018 – 2020

86%

CERTIFICATIONS

- MERN Stack (2025) — Speedup InfoTech, Pune — Hands-on full-stack development with real project implementation.
- JavaScript (2024) — Core JS concepts, ES6+, asynchronous programming, and event-driven architecture.
